ABOUT ME

I'm a practical-focused person with a love of solving problems through technology. I find it easy to learn new tools and languages quickly, and I like to go beyond the basics to understand how things work. I value a good technical challenge, work well in a team, and am persistent when I need to find solutions. I have a special interest in software development and like to build things that work efficiently and cleanly. I'm always looking to improve, both technically and personally.
